

Canfresh Liquid Fabric Softener

Cationic Liquid Softening Agent

Liquid Fabric Softener is a high quality cationic liquid product designed to soften and eliminate static cling from all fabrics.

The use of this product will shorten extraction time, increase flat work production, reduce tumbling and drying time and produce less fabric wrinkling. It is completely soluble and readily dispersed in hot or cold water to give uniform coverage to the entire load.

This product is ideally suited for use in industrial and institutional applications.

DIRECTIONS:

Liquid Fabric Softener can be added manually or with automatic dispensing equipment to the last rinse cycle.

When used in commercial applications, use 1 – 3 oz. per 50 lbs. of laundry.

When used in domestic top loading machines, add 1 oz. in the rinse cycle.

For Commercial Use
