

Canfresh Liquid One-Shot

Alkaline Sodium Hydroxide Detergent

One-Shot is an excellent detergent for highly effective washing of cotton and polyester, heavy soiled linens, towels, overalls and uniforms. It is a built, highly alkaline detergent containing sodium hydroxide, sequestering and chelating agents, surfactants and optical brighteners. No addition of alkali to the wash is required.

This product is a medium sudsing detergent especially designed to remove all degrees of soil in polyester and cotton materials. It will retain colors and brightness on both polyester and cotton garments. It is recommended in soft as well as hard water areas.

DIRECTIONS:

For light to medium soil, use 50 - 75 ml per 10 kg load (4 - 6 oz per 50 lbs).

For medium to heavy soil, use 75 - 125 ml per 10 kg load (6 - 10 oz per 50 lbs).

NOTE: Always use a sour in the last rinse when washing with this product.

For Commercial Use
