

Canfresh W.F.B.

Wine, Fruit and Berry

Pre-Spotter

This product is specially designed laundry pre-spotter, which excels at removing tough wine, fruit and berry stains. It contains emulsifiers, solvents and surfactants which work in synergy to remove even the most stubborn blemishes. *W.F.B.* is formulated without oxygen bleach so that it is safe to handle.

DIRECTIONS:

Clothing Spot Remover: Apply spotter to the stain. Ensure that the product fully saturates the stain. Work it in thoroughly until the stain disappears. Flush with water or rewash. Several applications may be necessary.

Pre-Spot Remover: Apply spotter to the stain or spot and leave it on the fabric for at least 5 - 10 minutes before including it in the general wash load.

NOTE: A stain is best removed before it goes through the wash cycle. An old stain already gone through washing and drying cycles becomes set and is always harder to remove.

For Commercial Use Only
