

Canfresh Ultra Soft Concentrate

Fabric Softener with Conditioners

Ultra Soft Concentrate is a highly concentrated cationic liquid fabric softener that softens fabrics and eliminates static cling. Ultra Soft is formulated with conditioners to prevent discoloration and rust staining in linens.

The use of this product will shorten extraction time, increase flat work production, reduce tumbling and drying time, and produce less fabric wrinkling. It is completely soluble and readily dispersed in hot or cold water to give uniform coverage to the entire load.

DIRECTIONS:

Add ½ - 1 oz per 50lbs of laundry to the last rinse cycle.

For Commercial Use Only
